

Rahsa Nusantara

Our journey
on being conscious of our food impact

Rahsa Nusantara

Locality & Diversity

to help modern challenges
of health and wellbeing

Women Empowerment

fair wage, fair opportunity,
and empowering culture

Conscious Living

strive to be more
conscious & sustainable

Rahsa Nusantara supports the Sustainable Development Goals.

Rahsa Nusantara | #RahsaUntukBumi

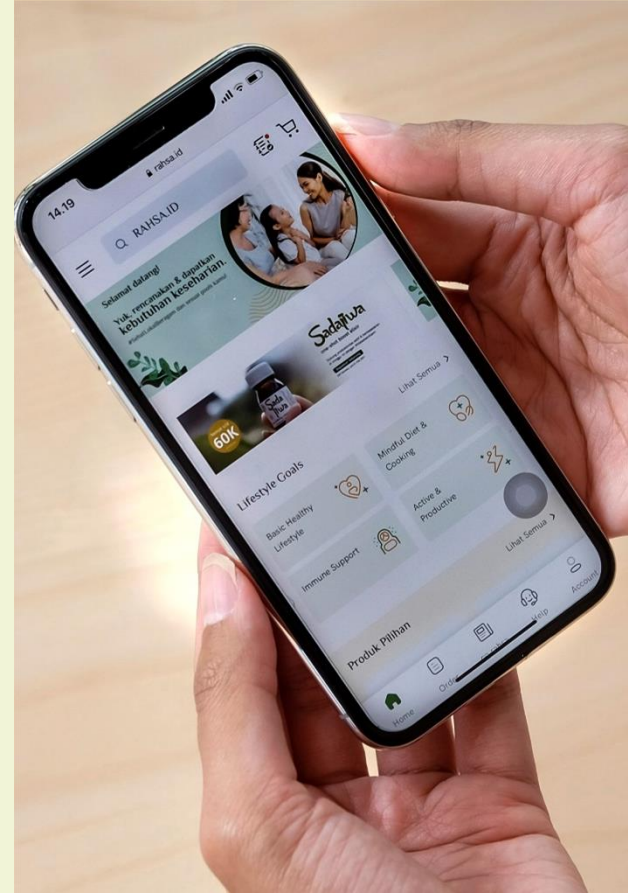

Starting in 2016,
in Bandung.

Healthy drink from **local herbs & spices without 4Ps** (synthetic preservatives, sweeteners, flavors, or coloring).

distributed in offline channels as well as by delivery, and with a **returnable packaging system.**

Our journey, from 2016 until 2021

One-stop solution focusing on locality & diversity for a healthier and more sustainable production-consumption

Reduce emissions from the food and beverages produced

Choosing local & biodiverse ingredients

- Selecting local & diverse ingredients to support biodiversity - from farmers, farmer groups, artisans and local suppliers.

Natural & healthy products

Photo taken in 2019

- Processing local & diverse ingredients into healthy products for our consumers daily consumption.
- With vision to support their healthier & more sustainable lifestyle

Processes our organic waste

- Sorting our production waste into organic, recycled and residue.
- Processing our organic waste with partner, to be integrated back into the natural cycle (as fertilizer or animal feed)

Reusable & returnable packaging

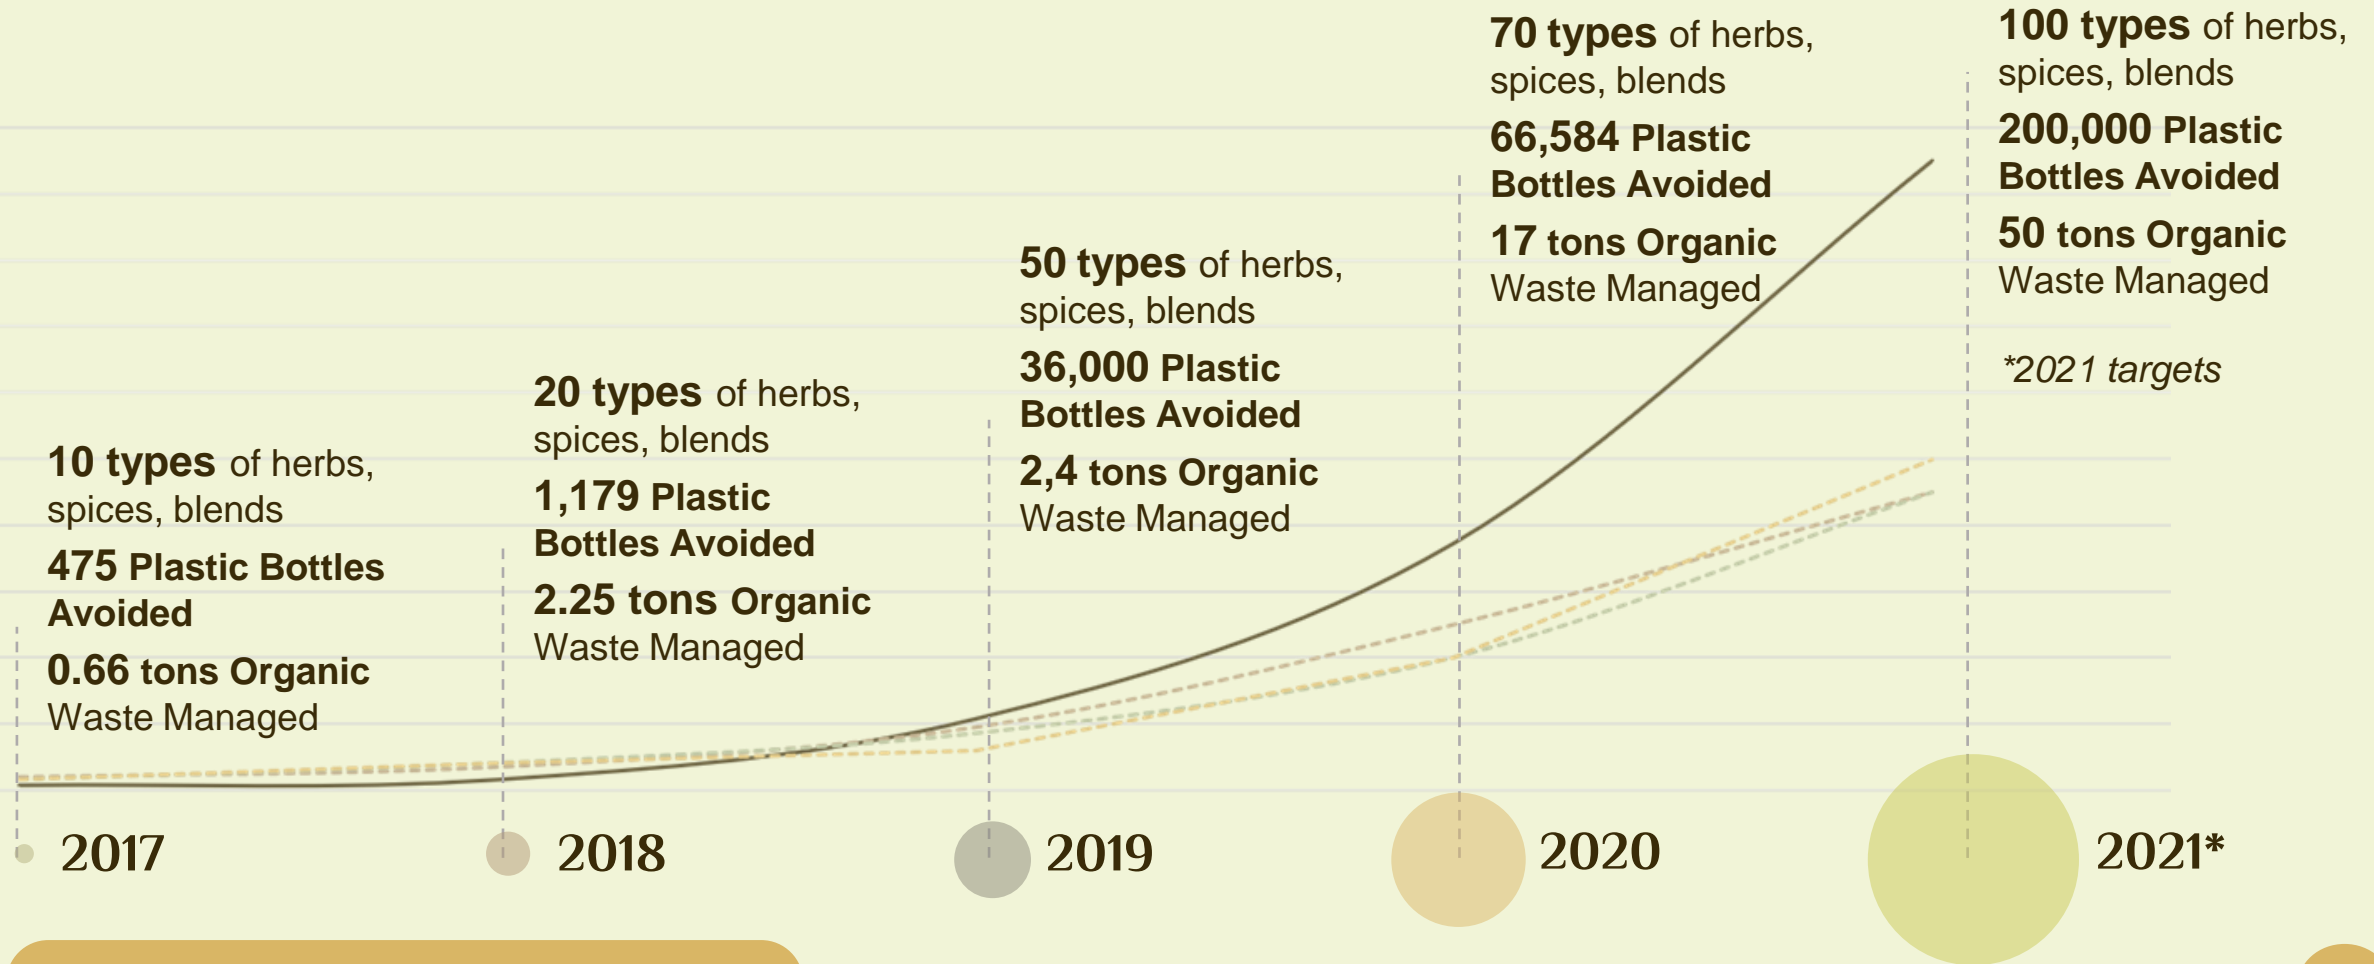

- Package our products in mostly reusable & returnable packaging (i.e. glass bottles and jars).
 - In addition, glass is healthier for the product (non-porous, non-toxic)
 - Glass can be reused without degrading & recycled with 100% quality without downcycling.

Reusable & returnable packaging

- We have build returnable packaging system since 2016 in Bandung & Jakarta, and now prototyping it for nationwide consumers.
 - Consumers send back empties to Rahsa Nusantera production system.
 - We give back the bottles values & sharing the shipping costs responsibility with customers, in the form of vouchers.

We start small... but with strong commitments and dreams

Commitment to calculate our food impact

- Initiated a commitment to measure our **impact from 5 dimensions**: Governance, Workers, Customers, Community, and also Environment.
- One of the steps that will have a huge impact is to start the **emission calculation & analysis of our operation & food impact**.

Thank You
